

Client's Laminated Laying Hen Cage Quotation in Bangladesh									
Party A: China Henan Yaxuan Machinery Equipment Manufacturing Co.							Quotation date 2024/10/10		
Party B: Client in Bangladesh									
Equipment type: 4 rows of five-layer cages for laying hens							120/60/43		
Chicken house size		Length of chicken house	76.2	Width of chicken house	12.2	Height of chicken house	4.85	work unit	meter (classifier)
Equipment Specifications		storey	columns	Chickens per door	Per assembly quantity of chickens	Number of cages per row	Total number of groups	Standardized loading	Chicken area (cm²/feather)
Equipment data		5	4	8	160	56	224	35840	450
serial number	Product name and specification	quantities	work unit (one's workplace)	Unit price (RMB)	Subtotal (dollars)	photograph	note		
One、	Cage system								
1	five-layer cage netting	224	organize	0			Cage frame material zinc aluminum magnesium 2.0 thick, combined cage frame without welding, cage mesh hot galvanized wire, beautiful and corrosion-resistant, stamping molding flat bottom, plate thickness ≥ 1.0 mm; 2.4 m/root; trough support hot dipped galvanized, plate thickness ≥ 1.0 mm, bolts fixed to the cage frame, stepping on the use of firm.		
2	Five-layer steel cage frame	224	organize						
3	Galvanized sheet metal egg stopper	224	organize						
4	five-tier trough	224	organize						
5	Trough Tray	224	organize				Hot-dip galvanized, 10/group cage doors with cross sliding doors		

6	water dispenser	224	bend				Square hose, conical drinker with V-shaped trough better reduces dripping and makes chicken manure drier
7	Plumbing V-Sink	224	organize				
8	doser	2	bend				
Total cage netting system:							(RMB)
two、	Feeding system						
1	Driving feeder	4	bend				The hopper is made of zinc-aluminum-magnesium plate, the Taili motor is 0.75 kW, the speed ratio is 1:80, and each hopper is equipped with one material leveler made of hot-dip galvanized cold-rolled steel plate 3.0 and two return devices.
2	Traction devices and accessories						Including 304 steel wire rope and hot dip galvanized bracket
3	Car guide rail						3.0 Hot dip galvanized square tube
4	Horizontal feeding device						Φ140MM galvanized pipe indoor feeding device, auger motor 1.5 kW, total 18 meters auger
5	Material tower	1	tower				20 tons material tower
Feeding system total:							(RMB)
three	Egg collection system						
1	Egg Picking Machine	4	SET				Made of zinc-aluminum-magnesium, soft egg filter, L-shaped egg claw, cascade egg picker with an egg breaking rate of 2%, and a motor of 0.75 kW. Speed ratio 1;120
2	Egg collection belt						Super long and durable imported nylon material
3	Egg Pickup						New Materials

	Card						
Egg collection system total:					0		(RMB)
4	Manure cleaning system						
1	Manure cleaning machine host	4	set				The rubber coating of the drum increases the friction between the manure belts, and two manure scrapers are installed. The manure cleaning motor is 1.5 kW, with a speed ratio of 1:120
2	Manure cleaning belt	280	Group				Imported polymer material, 1.2mm thick PP tape
3	Accessories	280	Group				Baffle, support rod (made of galvanized sheet) lifting lug
5	Horizontal and oblique manure transport device	21	rice				Each set of horizontal manure cleaning is equipped with a transmission roller, a belt pressing roller, and a tensioning roller. The head is equipped with a manure scraper, and the manure belt support rod is T-shaped, which can transport manure more efficiently.
Total manure removal system:							(rmb)
Total environmental control system and auxiliary equipment:							(rmb)
Five	Temperature control system and auxiliary equipment						
1	Fan	18	tower				1.4*1.4m push-pull type, stainless steel fan blades, 1.1 kW motor
2	Wet curtain	110	Square meter				High permeability, aluminum alloy frame, imported pulp, thickness 15cm
3	Wet curtain installation accessories	1	Dong				Water pump. Return pipe, elbow, direct pipe, inlet pipe, etc.
4	Deflector plates and accessories	110	Square meter				Electric automatic opening
5	linkage	5	set				Manual and automatic opening
6	Lighting	6	set	0			Dedicated lighting lines change light according to time
	small window for ventilation	60	indivual	0			Frame 1.15mm*320mm manual and automatic opening

7	7 Microcomputer Intelligent Environment Control System Environment Control System	1	set	00	0		The entire system of 18 wind turbines (overload, overvoltage, undervoltage, phase loss, inverter failure, line breaks, etc., can be timely alarm, and determine the direction of the fault) cell phone at the same time to receive a 10-inch touch screen, a small window to control outdoor temperature compensation
Total EMS and ancillary equipment:							(RMB)
VII. Summary of costs	Summary of costs						
1							
3	Total costs:					(RMB)	
	Above quote note:The price of 658470RMB is the factory installed price of all equipment. Does not include invoice, does not include freight, does not include tax, does not include equipment installation costs, customers agree with the initial price, details signed contract negotiation.						
eight	Equipment Engineering Installation Instructions:						
1	The above quotation is valid for 15 days. The labor cost for foreign installation guidance is 100 US dollars per person per day.						
2	The above quotation does not include cables other than equipment, which need to be prepared by customers.						
3	Before installation, Party B needs to provide an air compressor, and the front and rear ends of the chicken house need to be equipped with power supplies and installation cables。						
4	If the company needs to arrange the installation, please arrange the accommodation and meals for the installers according to the situation. 。						
5	When installing the equipment, Party B must appoint two full-time personnel to accompany the installation and training to facilitate the normal operation, operation and maintenance of the equipment.						

Nine	Company address, contact information and service phone number: 008613917849689; Email: landiii@foxmail.com Whatapp: <a href="https://wa.me/13917856548">https://wa.me/13917856548</a>
